## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 3-8,11-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2,9-10,14-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Takahashi et al (5793891).

As per claims 1,15-17, Takahashi et al (5793891) teaches:

“a model adaptive apparatus for performing an adaptation of a model used in pattern recognition which classifies input data in a time series into one of a predetermined number of models, said model adaptive apparatus” as model adapting of phoneme models (Col. 9 lines 4-30, col. 11 lines 62-65)

Art Unit: 2655

“data extraction means....extracted data” as acquisition and analysis of TS<sub>n</sub> data (fig. 9, subblock 21; col. 11 lines 1-25)

“model adaptation means for performing an adaptation .....extracted data” as training and updating models based on the recent vector time series (col. 12 lines 20-31);

As per claim 2, Takahashi et al (5793891) teaches:

“wherein said pattern recognition .....input data” as feature based distribution (col. 12 lines 20-25)

As per claim 9, Takahashi et al (5793891) teaches speech data (Fig. 2, subblock 21)

As per claim 10, Takahashi et al (5793891) teaches noise sound models (as noise models, col. 2 lines 40-52)

As per claims 14,15, Takahashi et al (5793891) teaches:

“feature extraction means.....input data” as feature extraction (col. 12 lines 20-35)

“storage means.....classified....classification means for classifying the features.....extracted data” as storing models according to syllables, words, and phoneme (col. 1 lines 35-50).

***Response to Arguments***

4. Applicant's arguments filed 7/28/2004 have been fully considered but they are not persuasive. As per the arguments presented on page 4 of the response, examiner argues that the actual scope of the claim language. Since Takahashi et al (5793891) meets the scope of the claim language, the rejection maintains. Examiner notes that further clarification (in the claim language) of the freshness function could distinguish the claim language over Takahashi et al (5793891).

***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
